Subject: Discontinuation of the Mold Man® 8000 production and support services

To our valued customers,

Effective immediately, due to changing demands in the market place, and discontinuation of electronic components, we have determined that the Mold Man® 8000 system can no longer be offered. The information below concerns the support of existing machines.

5 Year Parts availability:

MoldMan will continue to support and stock filters, seals, and O-rings until June, 2022.

3 Year Key Component availability:

MoldMan will have limited support for electrical components and heating elements, mainly PLCs and Touch Screens, for the **Mold Man® 8000** based on current forecasted order levels. Allen Bradley® has discontinued the PLC and Touch Screen models, future orders above and beyond forecast may not be filled as there may be no availability of these components.

For custom machined components, like the **Mold Man® 8000** heated reservoir and injection manifold, we will offer pricing on a case by case basis, as these will not be in-stock and may have a long lead-time.

MoldMan will continue to offer technical support for the **Mold Man® 8000** machines currently in service as well as application support for new mold-set requirements. Should you have any questions, please feel free to contact me directly.

Regards,

Stephen Sepulveda
